Hi Onkar,

Today we're announcing the 2019 Kaggle ML & DS Survey Challenge! In this email are the challenge details. You can find the executive report that summarizes the survey results here. Click the button below if you're interested in competing or digging deeper into the data.

Challenge Description:

This year Kaggle is launching the second Data Science Survey Challenge, where we will award a prize pool of **$30,000** to notebook authors who tell a rich story about a subset of the data science and machine learning community.

Based on nearly 20,000 survey responses, you will deeply explore the impact, priorities, or concerns of a specific group of data science and machine learning practitioners. You may define that group in the macro (for example: anyone who does most of their coding in Python) or the micro (for example: female data science students studying machine learning in masters programs). This is an opportunity to be creative and tell a story using the survey data!

Prizes:

- **1st place: $10,000**
- **2nd place: $8,000**
- **3rd place: $6,000**
- **4th place: $4,000**
- **5th place: $1,000**

Kaggle will also give a **Kernel Award of $1,000** to recognize our favorite kernel that gets published prior to 11:59:00PM UTC on Tuesday, November 19th.

- Final deadline: **December 2, 2019**
- Winners announced: **December 9, 2019**

Join the Challenge

Good luck,
The Kaggle Team
